[redacted]

THIS IS UNEVALUATED INFORMATION 25X1

1. In May 1954, it was learned that the Ministry of Posts and Telecommunications planned to merge the Post- und Fernmeldetechnisches Zentralamt (Central Office for Postal and Telecommunications Techniques)(PFZ) and the Zentralamt fuer Funktechnik (Central Institute for Radio Techniques) (ZIF) into a new institute which was to be called the "Post- und Fernmeldetechnisches Institut " (Institute for Postal and Telecommunications Techniques)(PFT). In order to convince the GDR Government of the importance of this measure, a tabulation of research projects to be handled at the new institute was drawn up.

2. A Central Bureau for Standardization, headed by Sobczyk (fnu), existed within the Central Development Department of the Main Administration for Radio Engineering Techniques at the nationalized radio engineering plant in Leipzig. This Central Bureau for Standardization was in charge of general quality and delivery conditions for all radio engineering plants. These conditions are laid down on so-called TGL sheets (Technische Guete-und Liefertedingungen). The Bureau for Standardization reports to the Ministry for Machine Construction and to the Standardization Bureau of the State Planning Commission at 80/82 Koepenickerstrasse, Berlin O 17. One (fnu) was assigned to this bureau in Berlin.

3. On 2 June 1954, an exhibition of contact component parts was scheduled to be held for designers and development engineers at the nationalized radio engineering plant at 15 Peterskirchhof in Leipzig. The exhibition was to be supervised by Ingenieur Jubisch (fnu).

[redacted] Comment. For organization and leading personnel of the Central Development Department of HV R-F-T at the Leipzig radio engineering plant (VEB Funkwerk Leipzig), see Annex. 25X1
